

UNIFIED CYBER SECURITY

: A Proposed Cybersecurity Law for Personal, Official, and Internet Security

Paalvi Lande 24108B0069
Shivam Pagar 24108B0035

Why is this law needed?

- Increasing cyberattacks and data breaches.
- Growing misuse of personal information.
- Lack of security on personal devices.
- Exposure of minors to harmful online content.
- Need for stronger protection of official and personal data.

Objective:

To provide secure digital communication, data protection, and responsible internet usage for all citizens.

Law 1 – Mandatory Data Encryption Act

Rule

- All personal, business, and government data must be encrypted.
- End-to-end encryption for messages and file transfers.
- Cloud storage providers must encrypt stored data.

Why?

- Protects confidential information.
- Prevents unauthorized access.
- Reduces impact of cyberattacks.

Penalty

- Heavy fines for organizations failing to secure data.
- Temporary suspension of digital services for repeated violations.

Law 2 – Smart Internet & Age Protection Act

Rule

- Under 13: Access only to educational and child-safe platforms.
- 13–17: Restricted access to violent, harmful, and illegal content.
- 18+: Full access with cybersecurity awareness requirements.

Why?

- Protects minors from cyberbullying and online exploitation.
- Reduces exposure to harmful content.
- Encourages responsible internet use.

Applicability

- Social media platforms.
- Online gaming services.
- Video-sharing websites.

Law 3 – Personal Device Security Compliance Act

Rule

Every smartphone, laptop, and tablet must have:

- Strong password or biometric authentication.
- Automatic security updates enabled.
- Malware protection.
- Data backup and recovery mechanisms.

Why?

- Most cyberattacks occur through unsecured devices.
- Protects official and personal information.
- Reduces identity theft and financial fraud.

Penalty

- Organizations allowing insecure devices on official networks face fines.

Conclusion & Benefits

Key Benefits

- ✓ Strong protection of personal and official data.
- ✓ Safer internet environment for minors.
- ✓ Reduced cybercrime and identity theft.
- ✓ Improved national cybersecurity standards.
- ✓ Secure smartphones, computers, and cloud services.

Thank You

Stay Safe, Stay Smart
